

# Grease Guns

## Cartridge & Conventional Fill ::

SERVICE WITHOUT FRICTION...

### Leverguns ::

A simple, efficient and cost effective method of lubricating the following:

- Agricultural Plant and Machinery
- Construction Equipment
- Mining and Quarrying Equipment
- Cars and Commercial Vehicles

The heavy duty **Levergun** typifies all that is best in multi-purpose, high pressure lubricating guns. Impressively **powerful yet lightweight and easy to use**, this gun is manufactured to the highest standards of performance and reliability.

.....  
The **Levergun** is the complete answer to an efficient **low cost** lubrication process.

.....  
A cranked operating lever enables the operator to achieve the maximum **400 bar delivery pressure** without undue effort and a spring assisted follower piston prevents grease cavitation. The piston rod can be locked in any desired position.

.....  
The Levergun is designed to handle pre-packed grease cartridges of **400g capacity (Ø 53 x 237mm)** and bulk grease. It is filled by removing the head assembly, complete with delivery tube and operating lever and then inserting the cartridge or loose grease.

Flexible Delivery Tube & Connector used on LL07

The guns are supplied, depending on the model with either a Rigid or a Flexible Delivery Tube and Hydraulic Connector as standard. Other Delivery Tubes and Connectors can be supplied as optional

PART NO ::	FITTINGS ::	DELIVERY TUBE LENGTH ::	BARRELL DIMENSIONS ::	BARRELL CAPACITY ::	MAX. OPERATING PRESSURE ::
LL05	Rigid Delivery Tube & Hydraulic Connector	150mm	290mm x Ø 56.5 mm	500ml	400 bar
LL07	Flexible Delivery Tube & Hydraulic Connector	200mm	290mm x Ø 56.5 mm	500ml	400 bar
